

The Texas A&M University System National Laboratories Office

The National Laboratories Office

FY 2023 - 2024

The Texas A&M University System (TAMUS) National Laboratories Office (NLO)'s mission is to facilitate a network of engagement between U.S. National Laboratories and TAMUS universities and agencies to create impactful contributions to national security, scientific discovery, and applied technology.

Our work creates opportunities for TAMUS researchers, faculty and students to engage with the Department of Energy's (DOE) National Nuclear Security Administration (NNSA) and their national labs.

TRIAD
National Security, LLC

Triad is made up of three members: Battelle Memorial Institute, The Texas A&M University System and the University of California.

Collectively, this team brings more than 120 years of national laboratory management and operating experience dedicated to national service which enables Triad to manage and operate Los Alamos National Laboratory for the NNSA. More information found at www.triadns.org.

11 Universities & 8 State Agencies collaborating with **17 National Labs** to build infrastructure & the next generation workforce.

Direct DOE investments across the TAMUS include **\$148.7 Million in research** across **232 programs**. Over **\$50 Million** into currently active Research and Development (R&D) and other programs due to NLO efforts.
